Meaningful Solutions for Problem Behavior Associated With Autism with Greg Hanley, Ph.D

Parent Presentation
Thursday, January 12, 2017
6:30-8:30pm
Northfield Park District
401 Wagner Road, Northfield, IL 60093

Gregory Hanley, Ph.D., BCBA-D has been applying the principles of learning to improve socially important behaviors of

children and adults with and without disabilities for more than 20 years. He worked and trained at the Spurwink School, the Groden Center, and the Kennedy Krieger Institute, was degreed at the University of Florida, was tenured at the University of Kansas, and is currently a professor of psychology and director of the Behavior Analysis Doctoral Program at Western New England University and an adjunct professor of psychiatry at the University of Massachusetts Medical School.

Although a diagnosis of autism is not based on problem behaviors like meltdowns, self-injury, or aggression - one or more of these types of behaviors will likely require attention at some point in a person diagnosed with autism.

Behavioral intervention is an essential part of addressing these problem behaviors. When you are able to identify the factors attributing to the behavior, you will see better outcomes.

During the presentation, we will discuss highly individualized and practical assessment processes which leads to fast, safe, and effective outcomes. We will also discuss treatments that parents have tested and seen success with.

Registration
(through January 11)
\$10/person
\$15/couple
